ABOUT CONFERENCE

The theme of the conference is **"Development of a Prospective Drug Molecule: From Initial Discovery to Marketed Product"**. This conference will explore the development of a potential drug molecule from initial discovery to market authorization is a highly complex, resource-intensive, and stringently regulated process. This journey encompasses multiple stages, including preclinical research, clinical trials, and regulatory approval. Each stage possesses different scientific, ethical, and financial challenges. The process commences with in silico, in vitro, ex-vivo, and in-vivo screenings to identify, optimize, and preliminary safety assessment of lead compounds. We will discuss the fundamentals of different phases of clinical trials and the clinical trial registries of the U.S., Europe, and India. The conference promises to be a premier platform for comprehensive understanding of these scientific and regulatory frameworks is crucial for pharmaceutical students and researchers, serving as an essential knowledge base for navigating the drug development landscape.
